— Backend Engineering Diploma,  
AltSchool Africa  
— Backend Engineering, TS Academy

## PROFILE

Backend engineer who designs and ships production systems for real businesses — ERPs, booking platforms, and the infrastructure that keeps them running. Currently CTO at Auntie Jay's Group and founder of Thryve Trybe, a mentorship community for developers moving into tech. Expanding now into AI agents and workflow automation, built on the same backend foundation.

BACKEND SYSTEMS · API DESIGN · WORKFLOW AUTOMATION · AI AGENTS

## EXPERIENCE

### Founder & Lead

**TCMLogic & Thryve Trybe** 2024 — Present

- Design and ship backend systems and ERPs for local businesses, owning each project end to end.
- Founded Thryve Trybe to mentor developers moving into tech, pairing on real backend work instead of tutorials.

### Chief Technical Officer

**Auntie Jay's Group** 2023 — Present

- Set technical direction for the group's internal systems, including an in-house ERP used daily across operations.
- Turn operational bottlenecks into working software in-house, without outside vendors.

### Full Stack Engineer

**Teranium Co.** Mar 2024 — Nov 2024

- Built and maintained admin dashboards and secure REST APIs in PHP, Laravel, and MySQL for client projects.
- Resolved production bugs and led code reviews and performance passes to keep applications reliable.
- Mentored student developers on coding practices and tooling.

### Technical Support Engineer

**Teranium Co.** Oct 2023 — Nov 2024

- Diagnosed and resolved client software and hardware issues, tracking each through to resolution.
- Documented recurring issues and fixes into the team's internal knowledge base.

## SELECTED PROJECTS

- OgbuOji Farm ERP — management system for farm operations, sales, and inventory.
- Wedding & event platforms — custom websites with RSVP and guest tracking.
- TCMLogic company site — designed and maintains the company's own web presence.
